

ProWork⁺ Storage Management System

Powerful - Fast - Efficient

Finally, a system that works the way you do and not the way it thinks you should. Customisable, powerful, cost-effective, easy to use and most importantly – yours!

The screenshot displays the ProWork+ Storage Management System interface. At the top, there's a navigation bar with icons for Home, Customers, New Customer, Invoices, Unpaid Invoices, and Company Details. Below this is a 'Summary' section with a date filter set to 'Fri, 27 Oct 2017' and a 'Your Company Logo' placeholder. The main area is divided into tabs: Customers, All Invoices, Unpaid Invoices, Assigned Units, and Notes. The 'Customers' tab is active, showing a table with columns for Customer ID, Initials, Surname, Telephone, Mobile, Email, Billing Type, and Units Active. The table lists several customers, including View Customer 1107, 1047, 1052, 1024, 1070, 1121, 1114, 1075, 1125, 1141, 1111, 1063, 1055, and 1119, each with their respective contact details and unit status.

All the power you need to manage and maintain your storage facility...

It doesn't matter if you rent storage facilities by the day, week, month quarter or more – the ProWork⁺ system can manage all of your data at the touch of a button. Once you have input the data, the system takes care of the rest for you.

The system was designed from scratch to cater for a diverse industry offering a service to commercial and private individuals. The need to build a system, which catered for all of those, was what led us to where we are today.

The ProWork⁺ system will manage all the clients you have in one place, simply, efficiently and effectively every single time. Your invoices will be generated for you at the touch of button. They are printed or emailed – you make the choice on a per-customer basis!

The control is in your hands and gives you more time for other things.

Quick Points

- Cost-Effective
- Easy to use
- Powerful yet adaptive
- Generate all invoices in seconds
- Works on staggered invoice dates
- Invoices printed and/or emailed
- Share data between users
- Easily print and/or email reports
- Works on Mac, PC or both!
- More secure as **NOT** web-based
- You **OWN** the product, **NOT** rented
- Can be used off-the-shelf
- Fully customisable if required
- Fully supported

The system works on both PC (Windows 7 and greater), Apple Mac or.. both at the same time! The system will work in an environment with both operating systems at the same time and share data!

What Will It Do For Me?

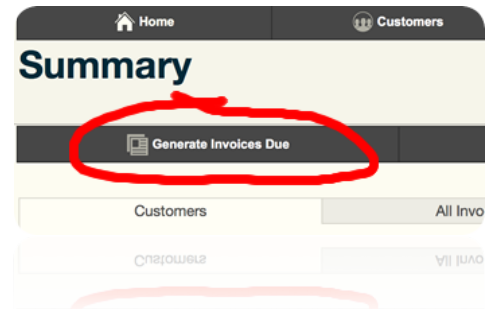

The advantages of the system are easy to see. The system will:

- **Save you time**
- **Allow you to work more efficiently**
- **Print all invoices, which are due**
- **Works with a mix of weekly, monthly, quarterly etc.**
- **Push a button, invoices generated**
- **Invoices can be emailed, printed or a mix of both**
- **Allow you more time to do other things**

Why spend time manually creating invoices for customers, let the system handle it all for you. Typical scenario:

A customer has multiple storage units. Another customer has one unit but wants to be billed every 6 months. A different customer has a unit and also stores a caravan. A new customer wishes to rent a container and a pallet space to store goods.

With a single push of a button, invoices will be generated for all of the above **only when their invoice is due!**

Push a button, generate invoices - that simple!

There's no tricky procedure or menu system to work through. Press the button, that's it! Add customers to the system with ease. Add containers or storage spaces to the system in a few clicks. It's your system and is built for you to save time.

All of our software is built to work on a PC running Windows 7 or greater, Apple Mac. It can also be run on both **at the same time!** As the system runs on your own systems it makes no difference if you have an internet connection or not. We do not build software to run on monthly payment plans, **you own the software completely.**

POWERFUL, FAST AND EFFICIENT!

Manage Customers Easily

When you view an individual customer, you can see personal details, which units they have assigned and all of the invoices assigned to them. You can also contact directly from this point. You can generate a single invoice for this customer should they need it. When the customer leaves, you can close one or all of their units assigned from this point.

This is your central point for each customer and is an easy, effective way to keep overall control.

The front screen shows an overview but allows you to drill down to each customer so see details on them as can be seen here.

How Much Does It Cost?

You've seen what the system can do. You've seen how powerful the system is. You've also seen how easy it is to operate, the only thing on your mind is – how much will it cost? The answer is simple.

You can go for a single copy that will run on one computer. You can have multiple copies which can be connected together so all users see the same information. A single copy will allow itself to be shared with four other copies of the system. This could effectively give you five users and all are able to operate independently. Data entered is visible to all users. This is from the standard, out of the box product. We can of course customise it for you.

You may wish to have different user levels so some users only see certain information – useful for sensitive information. You may wish the system to be able to generate reports specific to your company. The choice is yours as to what the system can do. If you have a question we'll be happy to answer it for you and modify the system to suit your specific requirements.

How The Cost Works Out

The system runs on a software package called FileMaker, the licence cost for this set by the manufacturer and is bought from them.

This software is the platform our systems are built on and is a necessary component which runs on your PC or Mac.

Pro Advanced - £ 432.00 + VAT.

Once you have the FileMaker software, our system runs from within that. Imagine if you want to create a spreadsheet, you buy say Microsoft Excel and build from there. This is a similar idea only much, much more powerful!

An individual licence for the storage system is £600.00. For that cost, you completely own the software. There is no monthly fee. There is an optional extra of an annual maintenance, which works out at £250. This entitles you to any updates of the system and support (we can connect remotely to your system and work with ease if you allow us permission). **This is an entirely optional cost and can be renewed for as many years as you wish.**

Should you wish the system to be customised we'll discuss what you're looking for with you and go from there.

SUMMARY

The total cost of the system works out at the total cost of the base FileMaker system plus the individual licences of the system.

1 x User - £600.00

2 – 4 Users - £450.00 per licence

5 Users - £430.00 per licence

Contact us for greater than 5 licences.

Newsflash!

There is a 10% reduction on the costs of a user licence until the end of the month. Grab this great offer while you still can and benefit from greater control at a reduced cost!
